Note from Hikori

"This is Hikori, and I felt speaking truthfully, I started college like two weeks ago, and I haven't been able to proofread. Really, that's why this update took soo long. I apologize. What's sad though is that when I finally could proofread, someone else had already started, so I had little to do with this update. Have fun reading manga, y'all!"

Note from Esteflnista

This note is regarding Hikori's message. Sorry. This release probably would've been released even sooner had I not lagged in setting everything up. Especially making this Credits page. -_- Anyway. Hope you guys enjoy the new typesetting!

Well, here is my credit page. The ID is "cliang", and I'm only one man doing this. I will do as much as possible during holiday, things will slow down afterwards.

emmm, I don't claim credit for any of the art work. I only did the translations and some editing. I do apologise for messing with some of the art.

Some note, I'm translating from traditional chinese. Since I'm used to read simplified chinese, it can be difficult sometimes. And since it's from Japanese->traditional chinese->simplified chinese->english. The mean of words could be wrong. Finding the charactors' names is a pain, so I used a online name translation program to do it. If there are errors, then sorry.

If there are grammer error, post it on the forum.

bad guys?

Here is chapter 30, only one chapter left for this volume. I will try to finish it by the end of this week This will be the gift from me to all the Shiawase Kissa Sanchoume fans out there. Well, fans who read the english version.

I set up a blog for all my comic works.

http //cliang-comicworks.blogspot.com/
The three chapter should be up there.

Last chapter's pages order were messed up, probably cased by a '-' in the name. I upload a new version anyway.

One more thing, I have no confident in the name translations in this chapter, specially the twins. Chinese verions used meaning translation, and english verions normally use pronunciation, so it's hard to port things over.
